SUMMARY

Data professional with hands-on experience across analytics, data science, and data engineering workflows. Proficient in Python, SQL, R, Tableau, and Excel, with strong capability in building dashboards, automating reporting, and deriving insights from large datasets. Experienced in ETL pipelines, cloud platforms (AWS, GCP), and applied machine learning techniques. Known for clear communication and effective collaboration to support scalable, data-driven decision-making.

EDUCATION

The George Washington University, School of Engineering & Applied Science <i>Master of Science in Data Science; GPA: 3.79/4</i> – Courses: Machine Learning, NLP, Data Visualization, Cloud Computing, DBMS	Washington, DC May 2026
St. Francis Institute of Technology, Department of Information Technology <i>Bachelor of Engineering in Information Technology; GPA: 3.2/4</i> – Courses: Data Structures, Artificial Intelligence, Software Engineering, Data Analytics	Mumbai, India June 2024

TECHNICAL SKILLS

Languages: Python, SQL, R
Data Analysis & Visualization: Excel, SQL, Pandas, NumPy, Tableau, Power BI, Matplotlib, Seaborn, ggplot2
Data Engineering: ETL pipelines, BigQuery, PostgreSQL, MySQL, DBMS, Data Modeling
Cloud & DevOps: AWS (S3, EC2, Lambda), GCP, Docker, Git, GitHub, CI/CD
Machine Learning: Scikit-learn, TensorFlow, A/B Testing, Feature Engineering, Model Evaluation, Cross-validation

EXPERIENCE

Data Analyst Intern <i>ECL Global (EXIN Consultancy Limited)</i> – Extracted, transformed, and loaded large datasets from SQL databases, APIs, and spreadsheets, maintaining data quality and reliability for analytics pipelines. – Conducted exploratory data analysis using Python, SQL, and R to identify trends, anomalies, and actionable insights supporting operational and strategic decisions. – Developed interactive dashboards and recurring reports using Tableau, Power BI, and Excel, improving reporting efficiency and stakeholder visibility.	Jan 2024 – Aug 2024 Kolkata, India
Dining Services Associate – Reporting Analyst <i>The George Washington University</i> – Developed and maintained inventory reporting systems to track usage trends, supply efficiency, and stock levels, supporting accurate forecasting and food stock management. – Analyzed dining operations and inventory data to reduce costs, forecast demand, and improve operational processes using descriptive statistics and trend analysis. – Ensured reporting accuracy and data compliance through validation, reconciliation, and structured data management practices aligned with operations analytics standards.	Jul 2025 – Present Washington, DC

PROJECTS & CONSULTING EXPERIENCE

Blink-IT Grocery Data Analytics Dashboard <i>Excel, Python, SQL</i> – Built a business intelligence dashboard for 8,500+ SKUs using KPIs and pivot tables to enable real-time sales and category-level analysis. – Performed data cleaning, imputation, and deduplication to ensure accuracy and consistency across transactional datasets. – Generated insights for inventory planning, store expansion, and product optimization across multiple retail formats.	Jun 2025
Heart Disease Risk Prediction Dashboard <i>Python, Tableau, GCP</i> – Developed a multi-tab interactive dashboard using CDC BRFSS data to visualize population health metrics and demographic trends. – Designed an end-to-end ETL pipeline with scaling, PCA, and statistical validation to analyze relationships between health indicators and disease risk.	Feb 2025 – May 2025
