SUMMARY

Data Analyst with practical experience in data visualization, statistical analysis, and BI reporting. Skilled in Python, SQL, R, Tableau, and Excel. I have a proven ability to design dashboards, automate reporting, and extract information from complex datasets. I have experience in ETL pipelines, AWS, GCP, and machine learning techniques. I also work well in teams and communicate effectively with stakeholders to support data-driven decisions.

EDUCATION

The George Washington University, School of Engineering & Applied Science <i>Master of Science in Data Science; GPA: 3.78/4</i> Courses: Machine Learning, NLP, Data Visualization, Cloud Computing, DBMS	Washington, DC May 2026
St. Francis Institute of Technology, Department of Information Technology <i>Bachelor of Engineering in Information Technology; GPA: 3.2/4</i> Courses: Data Structures, Artificial Intelligence, Software Engineering, Data Analytics	Mumbai, India June 2024

TECHNICAL SKILLS

Languages: Python, SQL, R
Data Analysis & Visualization: Excel, SQL, Pandas, NumPy, Tableau, Power BI, Matplotlib, Seaborn, ggplot2
Data Engineering: ETL pipelines, BigQuery, PostgreSQL, MySQL, DBMS, Data Modeling
Cloud & DevOps: AWS (S3, EC2, Lambda), GCP, Docker, Git, GitHub, CI/CD
Machine Learning: Scikit-learn, TensorFlow, A/B Testing, Feature Engineering, Model Evaluation, Cross-validation

EXPERIENCE

Teaching Assistant – Cloud Computing <i>St. Francis Institute of Technology</i> - Supported 40+ students with software setup, lab configuration, and troubleshooting in cloud computing environments, ensuring smooth coursework execution. - Tutored students in core cloud concepts and debugging, strengthening academic performance and reducing technical errors. - Coordinated with faculty to streamline course delivery, improving scheduling accuracy and optimizing resource management.	Jul 2023 – May 2024 Mumbai, India
Data Visualization Intern <i>Tata BY Forage (Remote)</i> - Built automated Tableau dashboards using pivot tables, charts, and formulas, improving performance tracking and enabling data-driven decisions. - Analyzed datasets with statistical methods to uncover trends and outliers, supporting business insights and troubleshooting irregularities. - Documented standardized workflows for web data extraction and visualization tasks, ensuring reproducibility, compliance, and stakeholder alignment.	Jun 2023 – Aug 2023

PROJECTS & CONSULTING EXPERIENCE

Blink-IT Grocery Data Analytics Dashboard <i>Excel, Python, SQL</i> - Designed and deployed a BI dashboard for 8,500+ SKUs using Pivot Tables, and KPIs, enabling real-time sales tracking across store types and categories. - Executed data wrangling workflows (imputation & deduplication) to ensure clean and consistent datasets. - Delivered insights for store expansion, inventory planning, and product optimization, driving growth potential in Tier 3 cities and mid-sized retail formats.	Jun 2025
Heart Disease Risk Prediction Dashboard <i>Python, Tableau, GCP</i> - Developed a 7-tab interactive dashboard using CDC BRFSS data (400K+ records) to visualize health metrics and demographic trends. - Designed an ETL pipeline for outlier handling, scaling, and PCA (55.2% variance in PC1/PC2), and performed statistical validation (Shapiro-Wilk, Anderson-Darling, D'Agostino K²) to reveal links between poor sleep, high BMI, and heart disease risk.	Feb 2025 – May 2025
